

What we do

Our free of charge conservation outreach consists of standard and personalized programs that meet the requirements of the Academic Content Standards for school-agers. We offer programs to Pre-K through Adults.

All of our programs can be tailored to fit your specific needs on a first come, first serve basis. To schedule a program, please contact the office at 937.456.5159.

Educational Programs Available (with recommended grades)

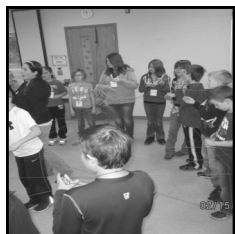

Education Programs

Our programs are intended to be a way to bring Conservation Education into the classrooms, to youth groups or adult organizations. All classroom programs follow the Ohio Academic Content Standards. Each program can be tailored to fit your specific groups needs. We can also create programs related to conservation, soil, or water by request that you would like presented to your class or group. The program sessions are designed to give an introduction, a wrap-up, or an enhancement to your curriculum depending on your specific needs and the presentation times vary.

Wetlands

Classroom Food Web

Fascinating Food Web

Grades 3-5

This program will turn your classroom into a food web after learning what components make up the food web.

First Impressions

Grades 3-5

A very interactive program which helps to understand why we feel a certain way about an animal when we see it for the first time and why it's important to the ecosystem.

Five Senses

Pre-K-2
Grades

This will take your class through their senses using inspiration from nature. A nature journal is an option. (multiple sessions)

Benefits of Trees

Grades 3-5

From a seed to a plant. This will teach students the importance of trees to the environment and our survival.

Wetlands

Grades 2-5

Characteristics of a wetland, the animals that live there, and why they are the most important habitat for wildlife.

Three R's-Reduce, Reuse, Recycle!

All Grades

Learn how easy it is to help our environment and save landfill space. Several crafts can be available.

EnviroScope Model

Grades K-6

An interactive watershed that shows water pollution. Add-ons are available to show Wetlands, Groundwater, and Riparian.

Stream Table

Grades 4 and up

A hands-on, interactive model that is designed to demonstrate the process a stream goes through. It also shows how we affect a stream and how the stream affects our lives.

Worm Composting

Grades
Pre-K-5

Learn how to reduce you waste by using vermicomposting and see how these worms turn it into compost with a live worm bin.

Wildlife of Ohio

Grades K-6

Learn about mammals, birds, reptiles, amphibians, and/or fish. Also, adaptations and behaviors. (multiple sessions)

We also have a Papermaking, Third Grade Soils, and a Water Cycle Model program .

Other resources that are available are loaner trunks from ODNR/Division of Wildlife. You can request one to borrow for your classroom or ask us if you want a program with it. All programs are available by request, Each program can be altered to assist with your specific class or curriculum. Please call us for details!

Preble SWCD Mission Statement:

To work with rural and urban landowners as well as government entities and agencies to ensure water quality and soil protection now and for future generations by strengthening the grass root effort of providing best management practices to all natural resources but especially those of soil and water.
